Professional Summary

QA Automation Engineer with 5+ years of experience in web and API testing, specialising in Java-based automation frameworks using **Selenium WebDriver, TestNG**, and modern **QA** practices. Proven ability to design scalable test frameworks, improve regression efficiency, and collaborate with Agile teams to deliver high-quality software. Recently focused on **AI-assisted QA** by building an open-source test case generator and a Selenium automation framework powered by a local LLM to accelerate intelligent test generation. Strong focus on automation strategy, quality engineering, and continuous improvement.

Key Achievements

- Reduced regression execution time by 60% by implementing a Selenium + TestNG automation framework.
- Automated critical booking and payment workflows, improving release validation speed.
- Designed reusable automation components enabling faster test script development.
- Improved defect detection by implementing structured test case design and API validations.

Technical Skills

Programming: Java

Automation: Selenium WebDriver, TestNG, JUnit

API Testing: Postman, REST API validation

Framework Design: Hybrid Framework, Data-Driven Framework, Page Object Model (POM)

Tools: Git, Maven, JIRA

Testing Types: Functional, Regression, UAT, API Testing, Cross-Browser Testing

AI-Assisted QA: LLM-based test generation, prompt engineering for automation.

Professional Experience

XENNEO Tech Private Limited — QA Engineer (Manual & Automation)

Dec 2019 – Present

- Architected and implemented scalable Selenium automation frameworks using Java, TestNG, and Page Object Model.
- Automated booking, onboarding, and payment workflows across multiple web platforms.
- Performed API validation and testing using Postman.
- Collaborated with developers for root cause analysis and defect resolution.
- Participated in Agile ceremonies including sprint planning, stand-ups, and retrospectives.

Projects:

Artist Booking Platform (NXTGIG)

- Designed and implemented automation frameworks using Selenium WebDriver, Java, and TestNG, improving regression efficiency by 60%.
- Automated test scripts for booking workflows, onboarding, and payment modules.
- Conducted API testing with Postman, validating data flow across modules.
- Debugged automation failures and collaborated with developers for root cause analysis.
- Performed end-to-end manual testing to validate business-critical workflows.

Ride-Booking App (Trrvlo)

- Conducted manual and automation testing of booking workflows and payment gateways.
- Created automation test cases in Selenium & Java, ensuring faster test cycles.
- Performed UAT, regression, and functional testing, ensuring quality before releases.

Online Cookie-Selling Platform (Classic Cookie)

- Automated cart and checkout functionality with Selenium WebDriver & Java, reducing manual test effort.
- Conducted usability and functional testing to validate customer journeys.
- Reported bugs in JIRA and ensured fixes were properly verified.

Additional Contributions:

- Transitioned successfully from design to QA, demonstrating adaptability and continuous learning.
- Provided UI/UX feedback leveraging design background, improving user experience.
- Active participant in Agile ceremonies (daily stand-ups, sprint planning, retrospectives).

AI Testing & Automation Projects

Open Source AI Test Case Generator

- Built an AI-powered tool using a local LLM to generate structured QA test cases from requirements.
- Automatically produces positive, negative, and edge test scenarios.
- Exports test cases into Excel-ready QA templates.

AI-Powered Selenium Automation Framework

- Developed a Selenium automation framework integrated with a local LLM.
- AI assists in generating Selenium locators, test steps, and BDD scenarios.
- Built using Java, Selenium WebDriver, and TestNG with Page Object Model architecture.

GitHub AI QA Portfolio

- AI Test Case Generator – Open-source project demonstrating automated test case generation using LLM.
- AI-Assisted Selenium Framework – Automation framework capable of generating Selenium scripts using AI prompts.
- Repository contains sample frameworks, test cases, and QA automation utilities.

Education

Bachelor of Engineering (Mechanical) – Savitribai Phule Pune University, 2017

HSC – Maharashtra State Board, 2012

SSC – Maharashtra State Board, 2010
